## **7. Information about the Industry in Which the Enterprise Conducts Business**

Throughout Turkey, there are 56 integrated facilities and 17 grinding – packaging facilities belonging to 29 groups and manufacturers. According to Türk Çimento data for 2021, clinker production capacity in Turkey is 99.590.230 tons and cement production capacity is 151.350.675 tons. With this capacity, Turkey ranks third after China, India in the rankings for in the world.

Taking into consideration and evaluating Türk Çimento data for 2022, it can be said that cement production is 4.371.391 tons. Total sales were 2.759.305 tons as domestic sales and 1.369.998 tons as export sales. Again, in this period, the export sales of clinker amounted to 687.839 tons. There is an excess of capacity in Turkey and exports have become necessary. Despite this excess capacity, cement facility investments continue in different regions of Turkey.

According to Türk Çimento data at the end of January 2022, cement production decrease by 14,5% compared to the same period last year. About 31,3% of the cement produced during this period is exported. Again, in this period, domestic sales increased by 22,2% and exports by 13,4%.

According to Türk Çimento data for January 2022, domestic cement sales increased regionally in all regions, while exports, except Mediterranean and the , from the Marmara, Aegean, Central Anatolia and Southeastern Anatolia regions increased.

*Notes:*

*1 (\*) Production, domestic and export sales data for Turkey and its regions cover factories that are members of Türk Çimento.*

*2 (\*) Türkiye kapasite ve üretim sıralamasında Cemnet 2020 E verileri baz alınmıştır.*

## **8. Position of the Enterprise in the Industry**

### **Marmara**

According to Türk Çimento's data for January 2022, domestic sales decreased by 22,2% in Turkey and 9,03% in the Marmara region compared to the same period last year. Exports increased by 13,04% in Turkey and 33,9% in our region. According to Türk Çimento's data for January 2022, 1.674.535 tons of clinker and 1.461.727 tons of cement were produced in our region.

### **Mediterranean**

According to Türk Çimento's data for January 2022, domestic sales decreased by 22,5% in Turkey and 15,1% in the Mediterranean region compared to the same period last year. Exports increased by 13,04% in Turkey, while a decline of 11,3 % was observed in our region. According to Türk Çimento's data for January 2022, 1.455.820 tons of clinker and 1.275.772 tons of cement were produced in our region.

**BOARD OF DIRECTORS' INTERIM ACTIVITY REPORT  
PREPARED IN ACCORDANCE WITH COMMUNIQUE NO. II-14.1**

**Black Sea**

According to Türk Çimento's data for January 2022, domestic sales decreased by 22,2% in Turkey and 36,9% in the Black Sea region compared to the same period last year. Exports increased by 13,4% in Turkey, while 4,2% fell in our region. According to Türk Çimento's data for January 2022, 499.492 tons of clinker and 384.021 tons of cement were produced in our region.

**Central Anatolia**

According to the data of Türk Cement for January 2022, domestic sales decreased by 22,2% in Turkey and 35,7% in the Central Anatolia Region compared to the same period last year. Exports increased by 13,04% in Turkey, while a decrease of 68,7% was observed in our region. According to the January 2022 data of Turkish Cement, 703.701 tons of clinker and 438.121 tons of cement were produced in our region

**Southeastern Anatolia**

According to Türk Çimento's data for January 2022, domestic sales decreased by 22,2% in Turkey and 31,8% in Southeast Anatolia compared to the same period last year. Exports increased by 13,04% in Turkey and 116,14% in our region. According to Türk Çimento's data for January 2022 499.139 tons of clinker and 281.390 tons of cement were produced in our region.

**9. Incentives**

The Company benefits from the Social Insurance Invalidity and Old Age Incentive No. 5510, disability incentive included in the quota subject to Law No. 5510 within the scope of the art. 30 of the Labor Law No. 4857, government incentive for students going through supplemental education per Professional Education Law No. 3308, Insurance Premium Incentive No. 17103 and 27103 and Additional Employment Incentive No. 6111.

**10. Development of the Enterprise**

The first concrete export by OYAK Çimento Fabrikaları A.Ş., which has started its activities on September 8, 1975, (Former Commercial Title: Mardin Çimento Sanayii ve Tic. A.Ş.) has been made to Middle East countries, in 1975. OYAK Çimento, with its strong and reliable reputation acquired in domestic and export markets, is a reason for choice in all around Turkey.

Taking into consideration the strategic plans and the synergy to be achieved regarding the targets in the cement industry, on 13.12.2019, it has been decided to start the negotiations with the intention to carry out the merger of OYAK Çimento Fabrikaları A.Ş. (Former Commercial Title: Mardin Çimento Sanayii ve Tic. A.Ş.) and Adana Çimento Sanayii T.A.Ş., Aslan Çimento A.Ş., Bolu Çimento Sanayi A.Ş., and Ünye Çimento Sanayi ve Ticaret A.Ş.

The "Announcement Text" on the merger was approved by the decision of the Capital Markets Board dated 20/02/2020 and submitted to the approval of the shareholders in the Extraordinary General Meeting held on 27.03.2020. In the Extraordinary General Assembly, the merger was approved. The merger has been registered at the Mardin Trade Registry Office on 14.05.2020.

The registration, at the Ankara Trade Registry Office, of the merger of Oyak Beton Sanayi ve Ticaret A.Ş., a subsidiary of our Company at the percentage of 100%, registered at the Ankara Trade Registry Office with the registration number 195300, in the midst of our Company, by

**BOARD OF DIRECTORS' INTERIM ACTIVITY REPORT  
PREPARED IN ACCORDANCE WITH COMMUNIQUE NO. II-14.1**

"acquisition" via the application of the method of "Facilitated Merger Procedure", as a whole with all its assets and liabilities, is completed as of 31/12/2020.

OYAK Çimento, which continues its activities in a wide area as the capacity and market leader of the Turkish cement industry, is a leading community that develops areas of use of cement with the principles of efficiency, creativity and profit-orientation, playing an active role in the country's market. OYAK Çimento Fabrikaları A.Ş., which adopted as its vision to be a respected, leading and reliable company, developing areas of use of cement and playing an active role in global markets, endeavors to increase sales volumes both at home and abroad.

**11. Units of the Enterprise**

The capacities of the branches and facilities of our Company are summarized in the table below.

| PLACES OF ACTIVITY  | AREAS OF ACTIVITY OF THE FACILITY         | Cement Production Capacity (Ton / Year) | Clinker Production Capacity (Ton / Year) | Grinding Capacity (Ton / Year) | Cement Stocking Capacity (Ton / Year) | Concrete Production Capacity (m3 / year) | Aggregate Production Capacity (Ton / Year) |
|---|---|---|--|--------------------------------|---------------------------------------|--|--|
| Adana Cement Branch   | Cement-clinker production and sales       | 3.5 million                             | 3 million                                |                                |                                       |  |  |
| Iskenderun Facility-I   | Cement-Ground Slag and Sale               |   |  | 1 million                      |                                       |  |  |
| Iskenderun Facility-II  | Cement-Ground Slag and Sale               |   |  | 1 million                      |                                       |  |  |
| Turkish Republic of Northern Cyprus   | Stocking and sales                        |   |  |                                | 8 thousand                            |  |  |
| Bolu Cement Branch  | Cement-clinker production and sales       | 2.5 million                             | 1.45 million                             |                                |                                       |  |  |
| Ereğli Branch   | Cement and Ground Slag and Sale           |   |  | 1 million                      |                                       |  |  |
| Ankara Branch   | Cement-clinker production and sales       | 1.7 million                             | 1.3 million                              |                                |                                       |  |  |
| Aslan Cement Branch   | Cement-clinker production and sales       | 3.3 million                             | 1.8 million                              |                                |                                       |  |  |
| Ünye Cement Branch  | Cement-clinker production and sales       | 2.6 million                             | 1.56 million                             |                                |                                       |  |  |
| Rize/ Çayeli  | Cement Filling and Packaging Facility     |   |  |                                | 21 thousand                           |  |  |
| Romania Facility  | Cement Filling and Packaging Facility     |   |  |                                | 8 thousand                            |  |  |
| Mardin Cement Branch  | Cement-clinker production and sales       | 2.7 million                             | 1.85 million                             |                                |                                       |  |  |
| Ready Mixed Concrete Facilities ( İstanbul, Ankara, İzmit, İzmir, Adana, Samsun, Ordu, Manisa, Aydın, Denizli, Afyon, Mersin, Hatay, Gaziantep, Osmaniye, Rize Kahramanmaraş) | Ready Mixed Concrete Production and Sales |   |  |                                |                                       | 9.5 million                              |  |
| Aggregate Production Facilities (Ayaş, Çerkeşli Cendere)  | Aggregate Production Facility             |   |  |                                |                                       |  | 5 million                                  |

**BOARD OF DIRECTORS' INTERIM ACTIVITY REPORT  
PREPARED IN ACCORDANCE WITH COMMUNIQUE NO. II-14.1**

**12. Products**

The product range of OYAK Çimento Fabrikaları includes the following types of cement. Portland Cement is used in construction projects that require high strength but do not require special attention to hydration heat and sulfate effect. Portland Composite Cement is used in general-purpose construction projects where blended cement is used and which require higher strength. Pozzolanic Cement is used in concrete exposed to sea water and groundwater, industrial floors affected by sulfate, mass concrete where low hydration heat is required. Blast Furnace Slag Cement is used in concrete exposed to sea water and groundwater, industrial floors affected by sulfate, general purpose construction, mass concrete where low hydration heat is required. Sulfate-resistant cement types are used in construction projects in areas affected by sulphated fields and sea water, in underwater construction projects, construction projects for bridges, dams and port foundations, in construction projects for retaining walls API Well Cement has been used in oil drilling wells and geothermal power plants with its high sulfate resistance (HSR), strength under high temperature and pressure, and workability. White cement can be used wherever grey cement is used. Their distinctive basic characteristics are that they have white color, aesthetic and decorative properties, and their strength gains are high. Ground Blast Furnace Slag is used as a secondary binder in concrete production.

The product information of our company is listed below;

**BOARD OF DIRECTORS' INTERIM ACTIVITY REPORT  
PREPARED IN ACCORDANCE WITH COMMUNIQUE NO. II-14.1**

Along with the production of all kinds of standard concrete of every class and type within the product range of ready-mixed concrete, OYAK Çimento Fabrikaları A.Ş. has a special and wide product range, developed by long term R&D efforts, whose trademarks are registered, every single one of which serves a different purpose, with a content and richness that may respond to every special need.

| <b>Brand</b>      | <b>Product Name</b>                      | <b>Explanation</b>  |
|-------------------|--|---|
| <i>DURABET®</i>   | Concrete with High Durability            | It is a special product with high durability that is resistant to severe environmental effects, with low water and chlorine permeability, minimized crack risk, and heat development control.   |
| <i>SMARTBET®</i>  | Self-Settling Concrete                   | It is a self-settling special product designed for building elements with narrow-sections and thick fittings, that may be easily placed and finished.   |
| <i>AQUABET®</i>   | Concrete with Reduced Water Permeability | It is a special product with reduced water permeability designed for any environment exposed to water and moisture.   |
| <i>SKYBET®</i>    | Concrete Pumped to High Floors           | It is a special product with high consistency protection and high strength that can be easily transferred over very long distances in multi-story office and residential buildings, vertically and horizontally.                                |
| <i>İZOBET®</i>    | Insulating Concrete                      | It is a special product designed for building elements where heat and sound insulation are needed.  |
| <i>FIBRABET®</i>  | Fiber Concrete                           | It is a special steel and polypropylene fiber reinforced product with high bending and impact resistance, and a reduced risk of premature cracks.   |
| <i>FIBROSHOT®</i> | Fiber Shotcrete                          | It is a special shotcrete product that is fast, practical and fiber-reinforced, used in manufacturing of tunnel and slope etc.  |
| <i>WHITEBET®</i>  | White Concrete                           | It is a special product manufactured by the use of special white cement and light colored raw materials for construction elements with aesthetic and decorative features.   |
| <i>REPABET®</i>   | Micro-fiber Repair Concrete              | It is a special fiber reinforced product that settles quickly and that can be used in the repair of factory floor concrete, road, apron and runway concrete subject to heavy traffic, with a low risk of cracks, high early and final strength. |
| <i>VIABET®</i>    | Sliding Formwork Concrete                | It is a special product designed in accordance with the working principle of sliding formwork systems in viaduct concretes.   |
| <i>POROZBET®</i>  | Permeable Concrete                       | It is a special product designed for areas such as parks, gardens, parking lots etc., with increased permeability.  |
| <i>DUALBET®</i>   | Road Concrete                            | It is a special road concrete that can be compressed with a cylinder and/or dumped with a paver.  |
| <i>DOZBET®</i>    | Dose Concrete                            | It is a special product designed based on a binding rate determined according to customer demand.   |
| <i>FLEKS BET®</i> | Fixed and Flex Line Concrete             | It is a special product designed according to customer demand, which can be conveniently pumped over long distances with fixed or flex hoses.   |

### 13. Developments Regarding Sales

While the Company continues its activities by targeting sustainable profitability, new investments are being pursued domestically in 2022. Regarding exports, new sales markets are being explored.

### F- Risks and Assessment of the Board of Directors

#### 1. Risk management policy

The Company manages the risks by identifying the risks that may endanger its existence, development and continuation and taking the necessary measures related to the identified risks. In this context, the Company established the Early Risk Detection Committee.

#### 2. Early Risk Detection Committee

The Company established this committee on 25/07/2012 and the committee consists of 2 members. The committee has met routinely from the date of its establishment to the date of the report, for the purpose of early diagnosis of reasons that endanger the existence and development of the Company and the implementation of the necessary measures and remedies for this and risk management, and submitted the reports it has prepared to the Board of Directors. Guidelines of the committee are available at the Company's website [www.oyakcimento.com](http://www.oyakcimento.com).

#### 3. Future Risks

In accordance with our awareness and priorities for social responsibility, our Company monitors future risks in order to maintain its activities in accordance with its goals regarding occupational health and safety, environmental sensitivity, regular optimization of its costs and to offer innovative products to our customers. All factors that may negatively affect our domestic and export sales quantity and prices are monitored.

There are none.

**BOARD OF DIRECTORS' INTERIM ACTIVITY REPORT  
PREPARED IN ACCORDANCE WITH COMMUNIQUE NO. II-14.1**

**4. Information about Employees' Social Rights, Vocational Training and Other Activities of the Company which Have Social and Environmental Consequences**

The company provides employees with health and life insurance. At the same time, to increase the skills of workers, the company organizes training both in business competency and social skills.

The company takes all necessary precautions by evaluating the possible environmental effects and dimensions of ongoing investments at the project stage. Environmental impact assessment reports have been prepared for each factory and project-specific to the company's activities, within this scope, EIA Positive Certificate and/or EIA Not Required documents prepared. Each factory has "Environmental Permit and License Documents" valid for Wastewater Discharge, Air Emission, Noise and Waste Incineration, and Co-incineration. The company takes action by monitoring all kinds of risks and environmental aspects for the protection, improvement of the environment, human health, safety, and to ascend the quality level by increasing the effectiveness of the "Integrated Management System", to create a healthy and safe work environment with environmental awareness, to comply with their wishes and tastes. The company aims to maintain customer satisfaction by offering products and services.

The company aims to improve quality, environmental awareness, occupational health, safety culture, reduce occupational accidents, create a healthy, safe working environment, reduce natural resource use and increase productivity. It has established an "Integrated Management System" that meets the requirements of ISO 9001 "Quality Management System", ISO 14001 "Environmental Management System", ISO 50001 "Energy Management System", ISO 45001 "Occupational Health and Safety Management System" and documented every factory.

The company updated its work on reflecting its economic, social, and environmental impacts on its management strategy by prioritizing it within the scope of sustainability in 2020, and published 2020 Integrated report, which shows both financial information and sustainability performances in the most holistic, effective and comprehensive way, on 28 May 2021. At the same time, the company completed the work on establishing a "Sustainability Board" and a "Sustainability Committee" achieved its mission on determining the sustainability strategies and targets for the next three years (2022-2025) in 2021, and prepared the 2022-2025 Sustainability Strategies Report in this direction.

The company became the first cement company in Turkey to make the "Net-Zero" commitment, which brings together the criteria that global companies need to set science-based targets to limit the global temperature increase to 1.5°C until 2030. The company continues to carry out pioneering activities in the sector by being among the business and financial institutions working with the Science-Based Targets Initiative (SBTi) to reduce its emissions in line with climate science.
