

BOARD OF DIRECTORS' REPORT
PREPARED IN ACCORDANCE WITH COMMUNIQUE NO. II-14.1

01 JANUARY – 30 JUNE 2022

**(CONVENIENCE TRANSLATION OF
INDEPENDENT AUDITOR’S REVIEW REPORT ON THE INTERIM ACTIVITY
REPORT)**

**To the General Assembly of
OYAK Çimento Fabrikaları A.Ş.
Ankara**

Introduction

We have been charged with reviewing the consistency of condensed consolidated interim financial information provided in interim activity report of OYAK Çimento Fabrikaları A.Ş. (“the Company”) and its subsidiaries (together will be referred as the “Group”) dated 30 June 2022 with the reviewed condensed consolidated interim financial statements. The Group Management is responsible from the aforementioned interim activity report. Our responsibility is to express a conclusion as to whether the financial information presented in the interim activity report is consistent with the reviewed condensed consolidated interim financial statements and explanatory notes over which auditor's review report is issued as of 19 August 2022.

Scope of Review

We conducted our review in accordance with International Standard on Review Engagements 2410, Review of Interim Financial Information Performed by the Independent Auditor of the Entity. Our review involves the examination as to whether financial information provided management's interim period report are consistent with the reviewed condensed consolidated interim financial statements and explanatory notes. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Deloitte refers to one or more of Deloitte Touche Tohmatsu Limited, a UK private company limited by guarantee (“DTTL”), its network of member firms, and their related entities. DTTL and each of its member firms are legally separate and independent entities. DTTL (also referred to as “Deloitte Global”) does not provide services to clients. Please see www.deloitte.com/about to learn more about our global network of member firms.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the condensed consolidated interim financial information provided in the interim activity report and reviewed condensed consolidated interim financial statements and explanatory notes dated 19 Ağustos 2022, in all material respects, are not consistent.

Emphasis of Matter

As stated in Note 5 of the accompanying condensed consolidated interim financial statements, the Group has trade receivables from various customers that have declared concordat and whose legal processes are continuing. This issue does not affect our conclusion.

12. Products

The product range of OYAK Çimento Fabrikaları includes the following types of cement. Portland Cement is used in construction projects that require high strength but do not require special attention to hydration heat and sulfate effect. Portland Composite Cement is used in general-purpose construction projects where blended cement is used and which require higher strength. Pozzolanic Cement is used in concrete exposed to sea water and groundwater, industrial floors affected by sulfate, mass concrete where low hydration heat is required. Blast Furnace Slag Cement is used in concrete exposed to sea water and groundwater, industrial floors affected by sulfate, general purpose construction, mass concrete where low hydration heat is required. Sulfate-resistant cement types are used in construction projects in areas affected by sulphated fields and sea water, in underwater construction projects, construction projects for bridges, dams and port foundations, in construction projects for retaining walls API Well Cement has been used in oil drilling wells and geothermal power plants with its high sulfate resistance (HSR), strength under high temperature and pressure, and workability. White cement can be used wherever grey cement is used. Their distinctive basic characteristics are that they have white color, aesthetic and decorative properties, and their strength gains are high. Ground Blast Furnace Slag is used as a secondary binder in concrete production.

Along with the production of all kinds of standard concrete of every class and type within the product range of ready-mixed concrete, OYAK Çimento Fabrikaları A.Ş. has a special and wide product range, developed by long term R&D efforts, whose trademarks are registered, every single one of which serves a different purpose, with a content and richness that may respond to every special need.

Brand	Product Name	Explanation
<i>DURABET®</i>	Concrete with High Durability	It is a special product with high durability that is resistant to severe environmental effects, with low water and chlorine permeability, minimized crack risk, and heat development control.
<i>SMARTBET®</i>	Self-Settling Concrete	It is a self-settling special product designed for building elements with narrow-sections and thick fittings, that may be easily placed and finished.
<i>AQUABET®</i>	Concrete with Reduced Water Permeability	It is a special product with reduced water permeability designed for any environment exposed to water and moisture.
<i>SKYBET®</i>	Concrete Pumped to High Floors	It is a special product with high consistency protection and high strength that can be easily transferred over very long distances in multi-story office and residential buildings, vertically and horizontally.
<i>İZOBET®</i>	Insulating Concrete	It is a special product designed for building elements where heat and sound insulation are needed.
<i>FIBRABET®</i>	Fiber Concrete	It is a special steel and polypropylene fiber reinforced product with high bending and impact resistance, and a reduced risk of premature cracks.
<i>FIBROSHOT®</i>	Fiber Shotcrete	It is a special shotcrete product that is fast, practical and fiber-reinforced, used in manufacturing of tunnel and slope etc.
<i>WHITEBET®</i>	White Concrete	It is a special product manufactured by the use of special white cement and light colored raw materials for construction elements with aesthetic and decorative features.
<i>REPABET®</i>	Micro-fiber Repair Concrete	It is a special fiber reinforced product that settles quickly and that can be used in the repair of factory floor concrete, road, apron and runway concrete subject to heavy traffic, with a low risk of cracks, high early and final strength.
<i>VIABET®</i>	Sliding Formwork Concrete	It is a special product designed in accordance with the working principle of sliding formwork systems in viaduct concretes.
<i>POROZBET®</i>	Permeable Concrete	It is a special product designed for areas such as parks, gardens, parking lots etc., with increased permeability.
<i>DUALBET®</i>	Road Concrete	It is a special road concrete that can be compressed with a cylinder and/or dumped with a paver.
