

OYAK Cement started lime production

OYAK Cement started lime production at its facility in Denizli. The facility will produce slaked calcium lime CL 80-S, which can be used in many fields such as construction, chemistry, industry, agriculture and environmental protection, as well as quicklime CL 80-Q and CL-90 Q products.

Operating in seven regions of Turkey as well as Portugal, Cape Verde and Africa, OYAK Cement continues to expand its product portfolio with new lime products. OYAK Cement started the production of slaked and quicklime calcium lime at its facility in Denizli.

The 'CL 80-S product', which is produced from 100% slaked calcium lime at the facility, offers a wide range of uses in the construction industry and construction material production, chemical and pharmaceutical industry, industrial processes, agriculture and environmental protection.

Quicklime products CL 80-Q and CL 90-Q can be used in the chemical and iron and steel industry, non-ferrous metal industry, agricultural food materials, industrial processes, construction industry and environmental protection.

OYAK Cement is also undertaking important projects in the field of sustainability with the slogan "Green is the new gold" of TCC Group Holdings, the main shareholder of OYAK Cement after the sale in March 2024. OYAK Cement is the first cement company in Turkey to commit to 'Net-Zero'. Exporting to 85 countries, including the USA, Brazil, Romania and Morocco, the company sets an example for its sector with its projects that reduce carbon emissions in production processes and final products. OYAK Cement also pioneers the sector globally with its calcined clay technology with a low carbon footprint.

OYAK Cement operates in the fields of cement, ready-mixed concrete and aggregate production worldwide.
